A MESSAGE FROM THE COMMISSION

Now that you have a copy of this directory, we hope you will take advantage of it by calling upon a consultant to work with you as you attempt to solve your unique problems in adult education or as you seek resource people for continuing education programs.

Whether you are a college president wanting to construct a residential adult education center, a director trying to solve a training problem, an architect creating an environment conducive to adult learning or a conference planner needing a speaker, we are certain that one or more of the experienced consultants listed in this directory can be of help to you.

The establishment of this directory is a pilot project offered by members of the adult education profession. The service will be continued if it is used by you and if it proves to be an effective way to ultimately better serve the millions of adults who are seeking to continue their education.

Dr. Clive C. Veri
Chairman of the Commission
University of Missouri-St. Louis

Commission Members

Dr. Harold Alford, Educational Testing Service
Dr. Thomas P. Bergin, University of Notre Dame
Dr. John Buskey, University of Maryland
Dr. Stanley N. Grabowski, ERIC Clearinghouse on Adult Education
Dr. Anita L. Martin, Consultant in Adult Education
Dr. Wesley C. Meierhenry, University of Nebraska
Dr. Floyd Parker, Michigan State University
Dr. L. Paul Robertson, Sandia Laboratories
Dr. Victor Stine, Northern Illinois University
Dr. John A. Vanderford, Department of the Army

WHAT IS THE DIRECTORY?

This publication is an attempt to implement the Commission's charge of giving leadership to the rapidly expanding adult education profession.

The rationale upon which the directory is based is that there are thousands of organizations and agencies which are now involved, or wanting to become involved, in providing adult and continuing education programs but need assistance either in solving special problems or in planning meaningful adult learning systems, facilities and environments. And, given that there are several hundred adult educators who have a great wealth of experience and are strategically located throughout North America, this directory is aimed at matching needs with available resources.

HOW TO USE THE DIRECTORY

The consultants are listed in alphabetical order. Locating information and academic background of the highest degree earned are included on each person as is specific information on areas of competence, experience, and the agencies or organizations which the consultant feels that he or she is more competent working with. "Conditions" such as geographic travel limitations or stipend are also included. The symbols S-F-E refer to systems, facilities, and environments--the areas of adult learning in which the consultants have special interests.

To use the directory, refer to Index A. Locate the organization, agency or profession which best describes your situation. The numerals after the agency refer to the consultant(s) you should contact.

Contact the consultant (preferably by telephone) to discuss your particular problem or situation. If the consultant feels that he or she can be of service to you, arrive at mutually agreeable terms for the consultation details.

COST OF CONSULTATIONS

The honorarium required by consultants is listed for each person under "conditions." When "none" is specified, the consultant will work with you at no honorarium for one day (or longer in some instances); the requesting agency should plan, however, to pay for travel, lodging, food and out-of-pocket expenses such as duplication of instructional materials.

Specific arrangements for the consultation are to be made directly between the requesting agency and consultant. Neither the Commission nor the Adult Education Association will become involved in the transaction between the consultant and agency.

FEEDBACK REPORT

Both the agency and consultant are requested to complete the "Feedback Report" on the back cover of this directory and send it to the address indicated on the form.

While AEA-USA shall not be held accountable for the quality of consulting services rendered, the feedback report will enable the Commission to determine the usefulness of the directory service. In addition, the Commission would be interested in receiving any comments you care to make about the utility of the directory.

SOME DEFINITIONS

ADULT LEARNING SYSTEMS are carefully designed teaching-learning experiences based on learners' needs and specific goals and behavioral objectives. Generally, input and output are measured; feedback loops are provided for system redesign; remedial or enrichment tracks tailor learning to the backgrounds of the learners.

ADULT LEARNING FACILITIES are buildings--sites--spaces--areas which provide opportunities for formal and informal teaching-learning transactions to take place. Such facilities might be a residential adult education center, a library or museum, a public school building, a remodeled NIKE missile center or jail, or a chestnut tree.

AN ADULT LEARNING ENVIRONMENT is the atmosphere in which learning takes place. Such an environment includes people and physical properties such as tables, chairs, heat, light, color, texture, and acoustics. It (the "atmosphere") could also include psychological, sociological and biological aspects which affect learning such as the attitude of the teacher, receptivity of the student, teaching-learning methods used, the content to be learned, and the physical and intellectual abilities of the learner.
